

Data analyst with skills in Excel, VBA, Python, SQL, MongoDB, and Javascript from Georgia Tech's data analytics and visualization bootcamp. Has a strong work ethic, a joy of learning new skills, and strong leadership skills. Finds pride in the ability to work with large unique data sets to find patterns that before went unnoticed. Recently completed a project using the FBI api and the Federal Reserve of Economic Data to compare median income to crime solve rates in Georgia counties. Using Python Flask, JavaScript, Flask, and SQL to create an interactive visualization of this data. Strengths include working with large and small groups, going above and beyond the call of each assignment, and finding unique ways to solve difficult problems.
